

## **ALSTEF GROUP PROVIDED EUROAIRPORT BASEL-MULHOUSE-FREIBURG WITH A NEW BAGGAGE HANDLING SYSTEM**

**PRESS RELEASE - Boigny-sur-Bionne, March, 26th**

### **Commissioning of the final integration phase of the standard 3 control machines at EuroAirport Basel-Mulhouse-Freiburg.**

This project led by Alstef Group since February 2019 ended with the reception and commissioning of the third and last Standard 3 check-in machine for hold baggage. EuroAirport Basel-Mulhouse-Freiburg is now compliant with the latest European regulations in force and a precursor.

The system also integrates a new process for the additional control of hold baggage by cynotechnical teams for which the imaging operators did not remove the doubts during the first levels of control. This innovative principle is unique in France. This configuration also reduces investments in machines and automated conveyor systems as well as operating costs.

The work was phased and carried out while maintaining operational operations, considered to be one of the major challenges for the airport. This challenge was achieved thanks to the performance of the teams in charge of the project and the close collaboration between EuroAirport Basel-Mulhouse-Freiburg and Alstef Group.

#### **About Alstef Group**

Alstef Group designs, integrates and supports automated turnkey solutions for the airport, intralogistics and healthcare markets. The group provides its customers with agile and innovative solutions to meet their present and future needs with its four business units: Alstef, BA Systèmes, BA Healthcare and Glidepath.

Across more than 10 countries and with installed systems on all five continents, Alstef Group has around 850 employees and generated revenue of €140 million in 2020.
